Jan 23: Breakthrough Ideas: How to Become a More Strategic Thinker

Intended for leaders who currently work with strategy, the focus of this session is on the learning aspect of strategic thinking: what it is and how to strengthen your own strategic thinking and energize the strategic capability of your organization. Being strategically competitive in today's chaotic and complex global environment requires a different way of looking at how we approach strategic thinking. Leaders who are tasked with strategic responsibility must be attentive, agile, adaptive and innovative thinkers. Four key issues are addressed in this session: Why do organizations need strategic thinkers? What is strategic thinking? Who is a strategic thinker? How can strategic thinking be developed?

Dr. Julia Sloan, author of the definitive book *Learning to Think Strategically*, is widely recognized for her pioneering work in the application of complex cognitive theory to everyday global strategic thinking practice. Her work draws upon more than two decades of her own expatriate corporate experience working on strategy to align the business agenda with prevailing economic, cultural and social issues.
