POWERFUL WOMEN LEADERS: HOW TO CONNECT, ENGAGE AND SUCCEED

In spite of this age of unprecedented access and opportunity for women in the workplace, women still lag far behind men in positions of power and leadership. This course will help women leaders and emerging leaders identify necessary tools for leadership, hone communication and negotiation skills, understand the role of emotional intelligence and cultural competence in achieving success, and harness the power of networking. This course will help identify common mistakes that impede influence and advancement. Participants will assess their current leadership skills and gain tools to enhance and solidify their position as an undeniable leader.
