## OVERTURNING OVERWHELM AT WORK

Even prior to the pandemic, overwhelm at work had become a pervasive issue. The pandemic only exacerbated the problem. The tidal wave of work and other demands coming at us is not likely to stop. To be sure, there are cultural and organizational issues that drive overload and need to be addressed. Nonetheless, there are things that we can do - and change - about how we behave and think that can give us a greater sense of agency and control, making us less likely to feel overwhelmed at work and prevent burnout in the longer-term.
