THE SUCCESS FACTOR: DEVELOPING THE MINDSET AND SKILL SETS OF HIGH ACHIEVERS

Nobody wakes up in the morning aiming to be average. Many people want to be successful but don't know how to approach this path. They have the potential but need a plan. Based on research and in-person interviews with astronauts, Nobel laureates, CEOs, and Olympic champions, this presentation outlines the methodological approach that individuals aspiring to improve their performance can adopt to achieve success.

High achievers share the same four attributes (intrinsic motivation, perseverance, strong foundation, constantly learning through informal means). The key to their success is that they do all four of these things in tandem.

Based on the book *The Success Factor* and using these four shared attributes as a guide, this workshop helps you reach peak performance by applying the lessons of high achievers in your own life: identify your passion using a Passion Audit; learn how and where to find a mentor and how to build a mentoring team; develop your own community of practice; pursue your interests through informal learning; and manage your time and energy.
